

MULTI-COMPARTMENT PET FOOD CONTAINER

Abstract of the Disclosure

An improved pet food snack and container for holding same and for providing and dispensing a dry pet food snack in combination with a highly palatable paste or sauce is provided. The container includes a tray, a dry food compartment formed in the tray having a unit of dry pet food and a wet food compartment formed in the tray having a quantity of wet pet food. The dry pet food compartment is spatially adapted to maintain a number of dry pet food units in a packaged order. The wet pet food compartment is preferably moisture impermeable. The wet pet food is preferably a flavored cream paste, includes oils and fats and is shelf stable.
